

BUCKMINSTER PARISH COUNCIL

RISK ASSESSMENT

2021

Definition of Risk Management

Risk is the threat that an event or action will adversely affect an organisation's ability to achieve its objectives and to successfully execute its strategies. Risk management is the process by which risks are identified, evaluated, and controlled. It is a key element of the framework of governance together with community focus, structures and processes, standards of conduct and service delivery arrangements.

Background

This document has been produced to enable the Parish Council to assess the risks that it faces and satisfy itself that it has taken adequate steps to minimise them. The Council is aware that although some risks can never be eliminated fully, it has in place a strategy that provides a structured, systematic and focuses approach to managing risk. The list is not exhaustive and the Parish Council may wish to consider other risks not identified. The table below:

- Identifies the subject
- Identifies what the risk may be
- Identifies the level of risk, giving the likelihood that the issue could occur and the potential level of harm if it did
- Evaluates the management and control of the risk and records findings
- Reviews, assesses, and revises procedures if required.
